

simple and reliably
Compact SE

Features of the COMPACT 04-4 SE / Compact 08-4 SE

- Tank capacity 3.5 litres or 8 litres
- Melting power: approx. 6 kg/h. (according to glue type)
- Connections for 4 hoses and 4 application heads
- Tefl on coated tank of cast aluminium
- Separate tank/glue spreader heating circuit for careful treatment of glue in storage tank
- Piston pump UES P14E with electrical switching, safe, quick, low noise level
- Standard electronics: Temperature indicator, channel display, scan function, temperature reduction, overheat protection, underheat start-up protection for the pump
- Potential-free contacts for machine enabling, alarm and minimum content level control
- Optimal content level control

Tried and tested COMPACT technology with simple operation and all the most important functions. Reliable operation with economic acquisition and low running costs.

Furthermore we also offer COMPACT2 hot glue systems with additional electronics including a multi-language, four-line clear text display as well as digital inputs/outputs and up to 7 hose and head connectors.

We supply variants from 4-18 litre tank volumes with various pumps.
